

A Summer of Fear or Truth

War with Iran anyone?

Why 9-11 Truth and Justice is essential to stopping the present war and new ones.

Basic equation:
Economic Collapse + 9/11 = War & Martial Law
(false flag terror)

The world financial system, dominated by the west and its Economic hit men", is presently in the final stages of a meltdown crisis that has been brewing for years. **Mainstream financial sources now acknowledge the crisis potential as the derivatives/hedge funds/mortgage bubbles are ready to implode. This is similar to the economic reality that was present the summer before 9-11.** The dollar is now ready to collapse into a Weimar style hyperinflation as the privately owned Federal Reserve prints and prints.

The **Terror Coup of 9-11** and related **Anthrax attacks** were implemented to ensure the domination of the U.S.A., such that the military might of the country could be used to control strategic regions of the world through war. The U.S./Britain/Israel are now under the control of a confederacy that has hijacked these nations to act like thugs for the loan sharks that dominate the present petro-dollar world financial system. This current stage of the dollar crisis looms at a time when the war in Iraq Afghanistan, etc. is turning to further chaos, Palestine is treated like the Warsaw ghetto and Iran gets to become the next enemy with which to blame and attack.

A Nuclear attack on Iran is on the table

The threat posed by Iran is their oil borse, a threat to the dollar, not nuclear power. It is we who have committed the nuclear war crimes in Kosovo and Iraq.

Beware of another 'false flag' terror event, possibly around the World Cup soccer matches in Germany, which would serve as the pretext to a strike with Nuclear weapons against Iran. Bush & company are potentially that stupid.

9-11 Justice is the key to Stopping War

No more haggling about pods

(debatable minutia is secondary to the main point)

Constitutional Justice for 9-11 Crimes Now

The President of the United States and most of Congress are in violation of their Oaths of Office, as the MIHOP Coup has been allowed to operate with Congressional consent, and media complicity in the cover-up of the truth.

We do not have until November to take back the country as some Democrats would have us believe. That did not work the last time with Kerry who allowed another election to be stolen. Election fraud can happen again as can an October Surprise!

We can and must save our country now, as is our duty, as citizens who can enliven the wisdom and similar call of the Declaration of Independence, and so defend our Constitution in this dark hour as is our responsibility to civilization and the planet.

Our call is to uphold the self-evident truths that all men are created equal and that we must defend our common promise and heritage of unalienable rights. *Our pursuit is happiness, not mere property!* Economic Freedom and abundance comes through progress, beauty, science and vision. Promotion of the General Welfare is our Constitutional remand. A New Deal of intensive economic development is required, where we can make the planet healthy and livable for a growing population. This is where the county and world must invest, not in bubbles. War for limited resources & control over the monopoly board will not work.

September 11th 2006 will mark the sentencing for the Enron thieves. The date, 9/11, is healing itself with justice. May the thugs and thieves who wave the Jolly Roger, Skull and Bones over the White House are getting their Rapture: 9-11 Reality; An inside job perpetuated for an oligarchy that is of the same nature as the enemy found in the Declaration of Independence.

I am proud to announce the Green Party of Vermont's call for Impeachment based on 9-11, relevant Resolutions to be started at the grassroots level, and the running of candidates on 9-11 Truth & Justice. May others join in as is their best talent.

May we here by unite as a 'United Front' to so save our Country, and this planet now.

Comments those of Bruce Marshall (Co-Chair, Vermont Green Party)

***"9-11 Truth is a very important issue with the power to bring lasting change to our Country"* –William Sloane Coffin 2006**
