November 8, 2003

Mr. Shipley:

I was amazed to see that the Workers Comp report from the TML's Risk Management Pool I requested in response to TML's offer to help municipalities improve their risk performance included the Social Security number for every single claimant. Did the person who sent this know that Eric Hall is suing over his Social Security Number being released? I am thinking there can be no one so uninformed that this document would be sent as a mistake in light of all the publicity over this matter, so I am posting the data with a belief that the City of Cookeville weighed the public's right to information and consciously evaluated the data as releaseable. If it is otherwise, please contact me. It is here:
