Called to say that she ate at Riverbrook on 9-22-3003 and had a salad on which the vegetables appeared to have a chemical on them – they tasted very bitter particularly cucumber. Also had an upset stomach that night. Told the manager who wanted to know what she wanted him to do about it. He also left it on her bill and totally didn't seem at all concerned.

10-16-03 The salad produce was OK today *AG*.
